ENVIRONMENTAL SUSTAINABILITY

Rediscovered Wood

More than 4 million pounds of post-industrial wood shavings a month become recycled wood composite toilet seats marketed worldwide by Bemis.

Reclamation of wood waste minimizes air pollution and depletion of forest-based natural resources.

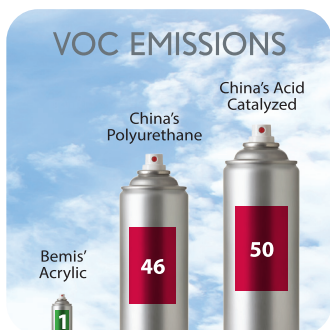

All toilet seats are packaged in recycled and recyclable corrugate.

Recycled Plastics

Processing product waste and post-consumer plastic keeps secondary materials from entering our landfills.

Co-injection molding, a process pioneered by Bemis, uses regrind waste in the cores of its products, instead of discarding it into landfills.

Water-Based Paint

Environmentally friendly colorants and water-based paints significantly reduce VOC emissions.

Painting 12 enameled wood seats emits the same VOC emissions as a single can of 8 oz hair spray, which is up to 50 times less than other processes.

MADE IN THE USA

Headquartered in Sheboygan Falls, WI and family-owned since 1901, we continue to grow with respect, teamwork, and leadership that builds strong roots for continuous quality, improvement and innovation. Every day, we take great pride in ensuring both value and quality in our innovative products for everyday life.

CONSISTENCY

Quality products that exceed the standards of our most discerning customers – delivered when needed, where needed, around the world... *Every Day.*

FOCUS

We singularly focus on toilet seats, listening to consumers and delivering products with features that meet their needs... *Every Day.*

INNOVATION

Market insight and ingenuity inspire our design and allow us to bring form to valued function... *Every Day.*

RESPONSIBILITY

Respect for the earth and all of its people – it's how we conduct business... *Every Day.*
